Ltd. is a leading IT service and product delivery firm, for the last four years we are serving our global customers come from a wide range of industries and with varying requirements. With our core expertise and deep domain knowledge we gained satisfied clients by delivering quality solutions. We provide technology support and branding assistance, for your perfect scalability.

**Innovation is technology
having creative fun!**

OUR MISSION

To deliver reliable solutions and quality services to make 'satisfied clients' through 'happy teammates'.

OUR VISION

Innovation is technology having creative fun. We would like to place Nextinnos with a well written signature for delivering user depending innovative solutions. Welcoming technology updates to serve our prospective clients with quality in time.

OUR QUALITY

Keeping up with quality standards is of primary importance at nextinnos. We assure nearly 100 percent accuracy and security for any of our services and projects with our reliable solutions and it's after services. This has gained us premium clients across the globe. Stringent testing in our solutions helps us to deliver superfine solutions to our customers. We communicate clearly and consider customer satisfaction and happiness of our clients as the key element in our success and growth.

OUR BEGINNING

We started our operations as Richinnovations in 2015 January 1st. After incubation in Technopark we owned our space inside Technopark itself, now we are rebranding our service for a better establishment, yes its NextInnos.

WHO WE ARE

We are a leading service and product delivery firm, with experience and expertise to offer our clients with innovative custom applications in various technical platforms and also provide various management systems essential to our client's businesses. Our global clients come from a wide range of industries and with varying requirements. We take pride in fulfilling our commitments on time, on budget and with quality.

WHAT WE DO

Innovations electrify us. Here we let our minds free to pursue dreams and implement ideas on a technology platform and deliver novel solutions to global users. At NextInnos, we provide IT services like websites, web apps, Ecommerce, marketplace, several back office and HR resources, Android & iOS mobile Apps and custom app development. Along with this we offer retail, Ecommerce, hospitality and educational domains.

HOW WE DO IT

INITIAL MEETING & **IDEA SHARING**

The final step involves actual deployment of the software in the client's organization. After installing the software, we will give detailed training to your employees about how to use the software. In addition to that we will also provide maintenance and support for the software. For support, we can provide a dedicated support team.

R.D & PLANNING

The second step involves collecting the required data from the client side and its proper planning, our team do detailed R&D to make the solution better. It includes knowing the actual operation and the process involved in the organization. The main reason for this data collection is to customize the software as per the needs of the client's organization.

FEEDBACK & **CONFIRMATION**

This step involves preparing a detailed documentation of the operation and process involved in the day-to-day management of the organization. It also involves proposing a solution as per the particular needs of organization and proposed changes that may happen once the software is installed. Will include the client feedback and confirm the same.

DEVELOPMENT & DEPLOYMENT

The fourth step involves commencing the actual development of the software by our team. Once the work has been started we will issue a module-wise release of the software to the client. During this time the client gets an opportunity to test the application from the initial level so that they can monitor the software from the beginning and make any changes that they may deem fit.

SUPPORT & **MAINTENANCE**

The final step involves actual deployment of the software in the client's organization. After installing the software, we will give detailed training to your employees about how to use the software. In addition to that we will also provide maintenance and support for the software. For support, we can provide a dedicated support team.

TECHNOLOGY BETTERMENT FOR YOU

MOBILE APP DEVELOPMENT

Our creative and R&D team collect specific requirement, whether to go for a native development or a cross-platform or hybrid approach. We also suggest on what platform to hit first, whether it would be iOS or Android or Windows or all of them, depending on the type of application and your target users. Our approach helps our customers in getting to market quickly and budget their investments in areas that would benefit them most.

WEB DEVELOPMENT

Our motto is to focus on your (our client's) goals, blending it with innovative solutions, strong research and QC mechanisms. We deliver solutions within your time and flexible budget. We keep you ahead of your business competitors.

E-COMMERCE DEVELOPMENT (WEB & MOBILE)

Every business has its own processes, goals and business strategies, so when looking for an eCommerce platform your requirements will also be unique to your business. Nextinnos will work with you to understand and solve your problems, whilst increasing conversion rates, streamline business processes and reducing overheads.

BLOCKCHAIN DEVELOPMENT (R & D)

Blockchain is the technology which powers cryptocurrency. Nextinnos have also forayed into the field of cryptocurrency and also in projects related to blockchain management. Our team has done projects related to an internationally reputed cryptocurrency and now has over a year experience in the field of digital currency and blockchain management.

DIGITALIZING YOUR BRAND IDENTITY

SEO_ SEARCH ENGINE OPTIMIZATION

All you had to do was just add keywords to your title tags and content and header tags – get a few back links and you get a good ranking. However, over the past few years phenomenal changes have been made to the search engines as to how they should react to a search results when someone does a search. There are several hundreds of factors/elements used by the search engines to determine how your site should fare in the results. Some of the more recent additions to these factors include speed of the site, responsiveness of the site, content and its quality, authority, and quality of technical code. So it is really important that a through audit be done on the site before starting an SEO.

SOCIAL MEDIA PROMOTION

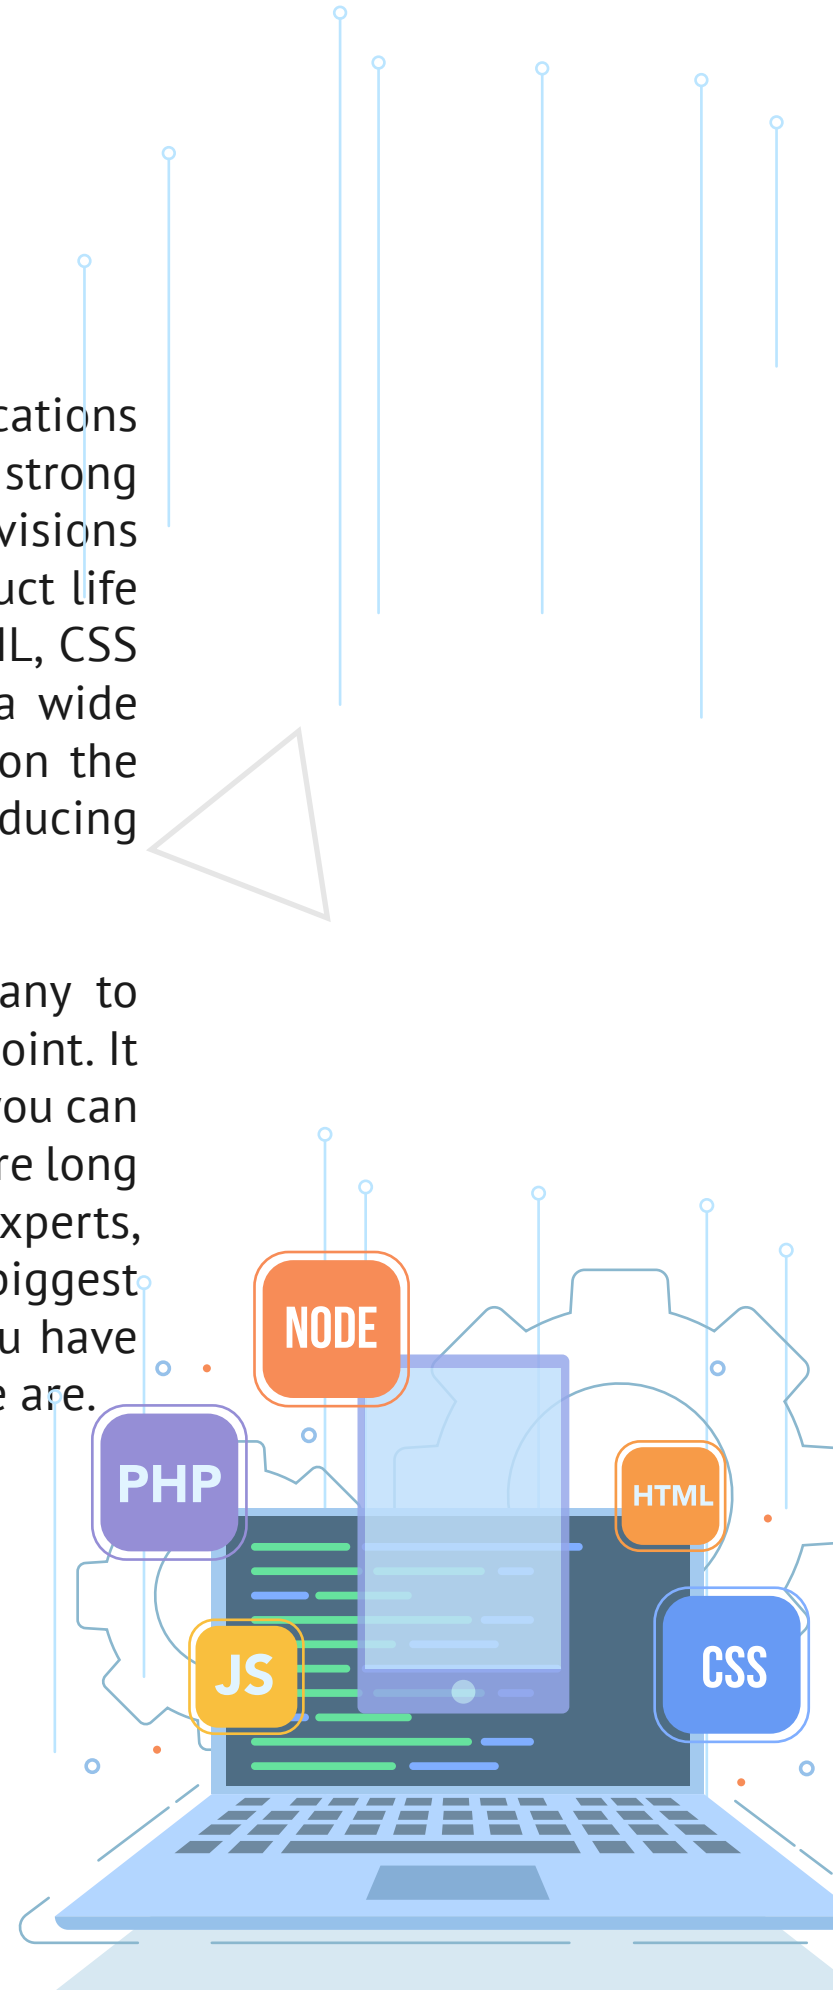

Social profiles such as Facebook, Twitter, Instagram and many other networks are simply a part of daily life for millions – in fact, billions – of us. The ubiquitous use of Facebook extends to more than a quarter of the earth's population- that's more than 2 billion active users. With such a far-reaching scope, it's no wonder that these networks have become such a valuable tool for businesses.

WEB DESIGNING & DEVELOPMENT

We are experts in developing end to end applications based on web technologies. We combine strong technological insight together with business visions to deliver you the accurate inputs across product life cycle. We use web technologies like PHP HTML, CSS and Javascript to deliver on-the-go access via wide range of devices. Our web applications/sites on the web help them to be highly flexible while reducing the maintenance costs.

Choose the perfect website designing company to hand over your dream projects is the crucial point. It like you are associating with a solid team that you can depend on. With some planning and focus, before long you can have a team (designer, developer, SEO experts, graphic designers, right sources) to rival your biggest competitors, at a fraction of the cost. Once you have the team, you have the leverage, that's what we are.

E-COMMERCE & MARKETPLACE DEVELOPMENT (NEX-CART)

NextInnos is a leading provider of eCommerce solutions for B2B and B2C eCommerce businesses. Our comprehensive and complete online retail systems comprising web and mobile platforms attract customers and encourage conversion. We provide customer-friendly, Device compactible, brand-focused website and mobile solutions. Ecommerce has become a symbol of business success, and a majority of customers take it for granted that most merchants and brand labels today will have an online site to receive product orders. Pulse Solutions has an enviable record of building successful storefronts online for both new merchants and well established companies.

A well-structured e-commerce site will enrich the user experience with faster loading times, better access to content and products, and improve Search Engine visibility. Whether you only have a single item or many items to sell online or you want to sell hundreds of items through a shopping cart and online store we can produce the solution you need. Our e-commerce systems are built using the latest web standards and Accessibility guidelines, enabling your e-commerce site to achieve higher search engine positioning, increasing site exposure, driving more visitors to your on-line shop and increasing your sales.
